Re: Panarelli & Henry
Short-term fluctuation of Copepoda populations in Jurumirim Reservoir (São Paulo, Brazil).

Dear Dr. Pinto-Coelho,

I would greatly appreciate if you could review the above-mentioned manuscript, which has been submitted to the journal *Hydrobiologia/Developments in Hydrobiology*, Special Volume "Proceedings of the 7th International Conference on Copepoda" (provisional title).

You will find enclosed one copy of the manuscript and one copy of the review and comments sheets. Please make your comments on these and **return them to me not later than October 29th, 1999**. Your comments will be transmitted to the author(s) anonymously, unless you decide otherwise.

It will help speed up the process considerably if you could forward your review to me by e-mail or telefax, and return a copy with the manuscript, by regular mail.

The editors of this special volume will read the manuscripts for English and style. Therefore please concentrate on the scientific and technical aspects of this manuscript, although all your comments will be much appreciated.

If you are unable to assist us, please notify me by e-mail and return the manuscript as soon as possible.

Thank you very much for your time and assistance.

Sincerely yours,

Rubens Mendes Lopes
